Table Notes

1. This data is a compilation from various sources including C4D Climate Finance Tracking (last version March 2018), data provided by Global Affairs Canada (November 2019), projects listed as principal purpose (mitigation or adaptation) in the GAC Historical Project Dataset (2017/18), commentary and projects listed in Canada's 3rd biannual report to the UNFCCC, and Recent Announcements at <https://climate-change.canada.ca/finance/RecentAnnouncements-AnnoncesRecentes.aspx>. Due to the difference between data sources and sometimes incomplete information, its accuracy is to the best ability of the author.
2. Canada's support for the UNFCCC budget is not considered part of Canada's Climate Finance - See Canada's 3rd UNFCCC Report, page 213 footnote and the Methodological Approach to Measuring Canada's Climate Finance on pages 256 - 257 The Report is available at https://unfccc.int/files/national_reports/national_communications_and_biennial_reports/application/pdf/82051493_canada-nc7-br3-1-5108_eccc_can7thncomm3rdbi-report_en_04_web.pdf
3. The replenishments of core financing for multilateral institutions are not included in Canada's accountability for its \$2.65 billion commitment. However, the climate relevant share of these replenishments are reported by Canada to the UNFCCC in its biannual reports, based on the OECD DAC's calculation of the climate relevant share for each of these financial institutions.
